

Who is Donald Snyder?

Founder and President of **Whiskey Resources LLC and Whiskey Systems Online**, Donald Snyder has more than 12 years of experience in the alcohol and beverage industry including holding senior management roles at the Buffalo Trace Distillery in Frankfort, KY and MGP in Lawrenceburg, IN. While working at the Buffalo Trace Distillery, Donald managed the barrel warehouse, small batch bottling lines, and distribution teams. He automated manual legacy operation tracking systems, simplified the required departmental government reporting processes, and survived numerous and regular TTB Audits.

At MGP, Donald managed the logistics of grain sourcing, barrel warehousing, and outbound logistics while implementing an advanced enterprise-wide system to track production, inventory, and TTB compliance. After leaving the corporate world to help the growing craft distilling industry, Donald created **Whiskey Systems Online** to help craft distilleries of all sizes with start-up business models and road maps, barrel warehouse management interfaces, intuitive distillery operations tracking tools, automated TTB Monthly Reporting and Compliance systems, and business management solutions.
